

Lower Grain Prices at Not The "Real" McKie C.N.R. Points

Continued from another page
boring lumping their shipments or in some cases by the elevator companies themselves filling up the balance of the car which the farmer could not himself fill.

Little Selling at Big Loss
Mr. Hall did not think that the farmer had sold at the December price, which meant a loss of sixteen cents a bushel, as compared with the October figure which could be obtained along the C.P.R. line. At least his company had not bought a bushel in the December figure.

Farmer Penalized
However, it must be understood that the elevator companies, because of the car shortage, could not buy along the Canadian Northern for October delivery, and hence the farmer who must ship on this system actually was penalized six to eight cents a bushel. This was a condition the elevator companies could not help but they were doing their best to save the farmers any preventable loss.

This penalty for farmers along the C.N.R. line was no new thing. Mr. Hall pointed out, and he recalled that last year oats sold along that line far from three to five cents lower than along the C.P.R.

Famous Whistle Board.

That all this trouble could have been prevented and that the farmers could have been saved the actual loss would have been the worst, was the statement of Mr. Hall, and when asked for an explanation he replied:

"The government should have kept control of the wheat situation. It should never have let this situation pass out of its hands. Had the farmers been assured a certain price for their grain—a uniform price—all would have been quiet and there would have been no penalizing because of the failure of one system to give equal transportation service with another. We have always been in sympathy with the government control of the price of wheat and it is too bad that the policy has changed."

Not The "Real" McKie

Some time ago we published an article dealing with a man named John McKie, who when up before the Police Magistrate at Calgary on a charge, informed the Magistrate that he wasn't a British subject, but was a Scotchman.

We attributed this remark to a farmer living south of Strathmore, named John McKie, but we have since been informed by Mr. John McKie, who farms near John's house, that he is not the same person as the one who was in the case.

Mr. McKie, a relative of his, is a man who has been in a police court in his life, and he was not in or near Calgary when the matter occurred. He is a man who is responsible for the remark, and he is a man who is a relative of his.

Rates Increased

By virtue of a judgment which will be issued from the offices of the railway commissioners, railway companies in Canada are granted an increase of 40 per cent in eastern Canada freight rates effective on Monday, September 12, and to continue in force until December 31.

From December 1st the increase in freight rates in eastern Canada is reduced from 40 per cent to 35 per cent and in western Canada from 35 per cent to 20 per cent. This increase applies to all freight commodities with the exception of those which are expressly in the jurisdiction for which special provision is made.

Simultaneously with the increase in freight rates passenger rates all over the country are advanced 20 per cent as long as they do not exceed four cents a mile. This increase is effective only to December 31. After that date and for the six months period from January 31, 1921, to July 31, 1921, a 10 per cent increase is retroactively applied to the rates.

Fine Exhibits at the School Fair

The fine exhibits at the School Fair caused many to sigh for an agricultural fair here. The only reason that there is no agricultural fair here, in this, the centre of the finest farming districts of the Province, is that no body has got down to offer to do any work in connection with its organization. This spring Mr. E. Dobson started the ball rolling, but as there is no farming community, it was decided that it was no use to carry on. You cannot have a fair without the cooperation of the farming community. If they want a fair they can have one any time but it means a little work and a little money subscribed to start with. One feels like getting busy next year.

Craigantler News

Carl Sorenson bought one of the new model Ford from O. P. Larson. Craigantler has a good share of threshing machines at work, and more than likely it will be one of the first districts to finish threshing.

The C.P.R. Irrigation Branch is rescuing their beavers and culverts.

The yields were very conflicting as yet. Some stubble wheat is yielding 10 other fields 25 bushels per acre.

There is quite a number of farmers intending doing a lot of fall plowing and irrigating this fall. Some of them would have paid them good heat if irrigated their stubble wheat and not especially.

Mr. L. H. Davidson says he intends to irrigate after this crop season, whether wet or not. Mr. Davidson has a splendid crop but he would have been better had he used the water.

New Century threshers are famed for their fast, clean work and for their easy-running qualities.

No other thresher built today enjoys such world-wide popularity as the New Century.

There is a reason for this. Learn why.

Bulletin From Prohibition Headquarters

The Announcement of a celebration of all voters in towns (from 100 to 1000) and Cities in Alberta has acted as a huge call to the temperance forces throughout the Province. They are now active and active everywhere. Even from points that were formerly the despair of organizers come such communications as this: "We have formed a Strong Committee here and will have our first meeting (this) week. Our first object will be to see that every citizen who will vote dry will have his or her name registered in good time."

The ladies are especially active. By means of Public Revenue and persons at canvases they are preparing to get every woman who is entitled to vote and is sympathetic to prohibition, out for registration.

Mr. H. H. Hall, Provincial Organizer, is now making a tour of Southern Alberta and will complete the organization of that part of the Province. He has with him as town mate Mr. H. Arthur Barton, an educator and lecturer, well known throughout the West. Mr. Barton never fails to grip and arouse his audiences with his free grasp of realities and imperatives, and his forcible prohibition address. "He makes one feel" says a correspondent, "that it is a privilege and honor to be on the side of prohibition."

A Conference of all Organizers for the Section was held in Calgary on Friday, September 10th to plan the rest of the Campaign; both Mr. Hall and Mr. Bishop being present. Another one will be held a week later in the north. Two ladies, specialists in organizing women's work, will be on the job by September 15th and will do much toward speeding up and perfecting this important branch of the prohibition organization.

Japanese Agricultural Commissioner Buys Holsteins

A most interesting sale is by the Canadian Stock Farms of Oconomowoc, Wisconsin, to Dr. Kikuchi S. Iwanami, Commissioner of Bureau of Agriculture, Tokyo, Japan. Dr. Iwanami came to the United States in search of purchased Holsteins, which he explained were to be used for demonstration purposes in building up the dairy herds of Japan.

While we have no record of his other purchases, the Canadian Stock Farms advise that five animals were bought by Dr. Iwanami at a price averaging better than \$1500 per head.

The above five animals are in better form and individually are as fine as one would like to see.

A little earlier in the year Y. Kurihara, Yokohama, Japan, purchased several head from the Western Farm, Seattle, Washington.

This was the second purchase from the Canadian Stock Farms by Kurihara. In 1915 he came to America to purchase registered Holsteins for his breeding farm. After inspecting a number of cattle, he purchased three bulls and five heifers from the Canadian Farm.

Both of these sales are most interesting in that they demonstrate the recognition of the Holstein cow as a producer and are but an illustration of what can be accomplished if proper publicity is given the breed.

Carlsland News

An enjoyable and largely attended dance was held in Mr. Frank Davis' new barn on Friday evening. The music, provided by Mrs. Trainers' Galaxy Orchestra, was first class and everyone present had a thorough good time. The new barn has been built to replace one burnt down by fire some time ago.

Mr. W. L. Brown has just returned from Eastern Canada with his bride and is receiving the hearty congratulations of local people. Mr. Brown's bride was suitably attended with about four dozen pairs of old boots strung in the form of an arch of welcome, and there may be further welcome celebrations before we go to press.

Threshing has commenced in the district, and the yields, from all accounts, are going to be high. On Thursday J. Nelson, S. Nelson and full Bergquist commenced threshing, and across the river Joe Buck and John Martin have also started.

Mrs. Geo. Cople has been visiting with her parents at Strathmore during the past few days.

Lights and Shadows of an Ohio Town

From this comes a story which gives an insight into what modern conveniences have come to mean in the farm home.

A certain farm home in Montgomery County, Ohio, was almost entirely destroyed by fire a short time ago. The house was of brick, roomy and substantially built as most old-fashioned farm homes are. Thick stout walls and good workmanship are probably what saved the house from being destroyed, but it was not, nothing more but the four walls were left standing. The place is being remodelled now with some improvements and considerable changes as to interior arrangement. The owner is seeing to it in this rebuilding that the new house will have all modern conveniences.

Among such conveniences is, of course, electric service. The owner had electricity in the old home, the electric plant being installed in the basement. In a fire which destroyed everything inside the walls the plant of course was ruined. Fortunately there was a new garage on the place a short distance from the house and the family was forced to move into this garage temporarily. The first thing that the farmer did on the morning after the fire was to call up the man who sold him the electric plant and order another one. Before night the new plant was in and the family were enjoying the convenience of electric light despite the fact that they had no house to live in. The pumping system which supplied the old house and a little disrepair, but it was not destroyed in the fire, so that it was an easy matter to pipe the water to the garage just as they had in the house.

This experience also is slow the extent to which the farm family becomes attached to modern conveniences. This particular family has found that electric light and running water have made life in their present quarters crowded living quarters much more comfortable and it is certain that they will make the fullest possible use of electricity in their new home when it is completed.

Rockyford News

Moore Thorn & Sprague of Moore Jaw Bank, General Manager and Superintendent of the Imperial Lumber Yards, Ltd., made a business visit to Rockyford and Tabor on Tuesday and Wednesday.

Mr. Fred Mannix is in the district overseeing the harvesting and threshing of his crop.

Mr. Johnston of Rockeford Land and Irrigation Co. is in town looking after the interests of his company, as they are interested in several farms in this district.

Mr. J. J. Dahn and baby spent the holidays in Calgary visiting friends.

Mr. Hy. Katterhagen spent the holidays at her home in Calgary.

Mr. O. A. Holmes returned from Spokane on Monday.

Mr. Rowes of the Bowler Hardware Ltd., spent the week end in Calgary.

A large number of Rockyford people took in the dance at Rollands on September 2nd.

Mr. Roberts was a visitor at Trout Lake a few days last week.

Mr. Chas. Koster of Earling, Iowa, is visiting at Mr. Fred Stitt's farm.

Accent and dance will be given on Friday, September 17th by the Variety Quartet. This is the first of a series of concerts to be given during the winter. Everybody come and help make the occasion a success.

Mr. N. H. Gilbert of Gilbert Bros. Ltd. is in Rockyford looking after his interests.

Happy Graham and his family of three, are erecting a magnificent mansion just bordering the fashionable district of the city. At date of writing there were not less than twelve helping to put shingles on the roof and we are wondering if they will finish the residence for the cold weather. The style of architecture has been copied from renowned mansions in Rome. When completed you will have to show your card before being admitted at the door to hope that the crowds will be plentiful and expect that there will be at least an opening dance given to commemorate the event.

The Budd Bros are building a whole city of racks on 1st ave. west. It is up to Mr. Durey to fill up the town one still granaries.

Miss E. Dobson, the teacher at the Laydon school, spent her holidays visiting friends around Kaysville.

Mr. Phelan, formerly teller at the Canadian Bank of Commerce, here, and now of Harrow, spent the holidays here, visiting his old friends.

What has happened to our \$4000.00 adventure loan? We would like to have a little information on the subject. Apparently none knows anything as regards Rockyford Council matters.

Mr. and Mrs. A. Ponce, of Natchitoches, announce the engagement of their only daughter, Constance, to Mr. W. P. Poir, of Calgary. The marriage will be given later.

A Manicure dance will be given in the Rockyford Town Hall on Friday September 24th. Full particulars will be given later.

The second of six series of concerts to be given during the winter in the Rockyford town hall, will be on Saturday, September 26th, by the Maple Leafs. All those who attended the first of the series, the Variety Quartet, on the 17th will no doubt be present.

If times are correct we are to have three new residences in Rockyford within the next fifteen days. This is a sure sign that the town is undergoing steady growth and with a crop in sight there is no doubt that many of our farmers will come to town to spend the winter and send the children to our school. It is a great comfort to expect that they will build some real nice homes and help improve and also make the town larger.

The Importers Agents report the sales of half quantities of ingredients and machinery. One dealer having sold over fifty bales this season in Rockyford.

It was stated on the Calgary Press Exchange. Tuesday that there is an anticipated crop shortage on the Canadian National Railway in Alberta, particularly in the Rockyford district. Farmers are in a bind in their wheat to the elevators at the rate of 1000 bushels and 5000 bushels a day and all the cars that are available are the ones that have been unloaded in the yards. In other words farmers are to take care of this large volume of business are being sent in practically similar conditions around to exist in the Rockyford district.

Standard Locals

Mr. S. Hansen, of Moore Hansen Bros. has sold out. As a Hardware Storekeeper he has been a great success in every respect and there is no one in this area who has not expressed regret on leaving the news of his impending departure. Mr. and Mrs. Hansen are selling the entire contents of their home before leaving the California early in November.

Mr. O. Buckwald and Mr. Chris D. Nelson were tasked to treat over their new International separator. Threshing went off without a hitch and the first load of new wheat was hauled to the National Elevator on the 22nd September.

Mr. Axel Larson has just bought a new Dodge Car.

This area has known a number of quite good seasons, but this one beats the lot. Everybody is happy or ought to be.

Mr. Fennel's daughter had her leg broken as the result of a kick from a horse. She is doing as well as can be expected under the circumstances.

There was a big attendance at the Union Church in the school on Sunday last, there is still room for more.

Miss Ruth Elliott of the Scottish Nurses Home, Calgary has located in Rockyford and is starting a similar institution there. She is now ready to receive cases. Miss Elliott took her training in London England and ran a nursing home in Lonsdale, Alberta for two years.

As a result of a runaway near Hargreaves on Sunday last, one of the occupants of a demountable received severe injuries to the breast and chest.

Threshing has been general for some time now and many farmers regard this as the best time to be in. Quite a number of local people figure on wintering in California. Our editor is wintering at Standard.

Mr. and Mrs. Chris Joergensen wish to extend their thanks to those who have been so kind to them during their recent bereavement.

THE RUMELY OIL PULL TRACTOR
Certificate of Guarantee
 The guarantee made by Rumely Oil Pull Tractor Co. is here presented in full. It is a guarantee of the highest quality of workmanship and of the best material and construction. It is a guarantee that the tractor will be reliable and efficient for a long period of service. It is a guarantee that the tractor will be a true investment for the farmer.

The Rumely Oil Pull Tractor the Guarantee and Company behind it

After over three-quarters of a century of success in the manufacture of threshing machinery and steam engines, Advance-Rumely pioneered the adaptation of the internal combustion engine to the farm.

Looking forward, Advance-Rumely saw the day when low cost oil would supplant gasoline as tractor fuel. Its aim and accomplishment was to design not merely a tractor, but one which would operate successfully on oil fuels. So the first successful oil tractor was built in the Advance-Rumely factory, and given the name Oil Pull.

The Tractor

The big outstanding feature of the Oil Pull is its guaranteed successful performance on all grades of kerosene. To that, however, must be added its proved strength of construction and long life—its automatic regulation of speed to every change in load—its system of oil cooling—its ease of control and simplicity of operation—its ability to handle every kind of driver and belt job. It is these "inbuilt" qualities for which the name Oil Pull stands, and to which it owes its far reaching reputation.

You can now get an Oil Pull in any one of four sizes—all standard in design and construction. There's a size to fit your farm—12-20, 16-30, 20-40 and 30-60 H. P.

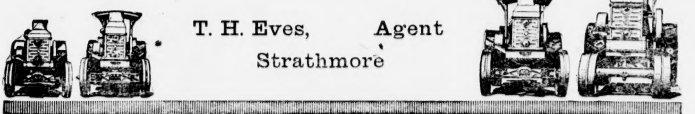

The Guarantee

The guarantee that backs every Oil Pull is the kind of guarantee you could expect only with a real oil burning tractor—one designed from the start to burn oil—no absolutely free from "make-over" gasoline engine construction.

Half the time operation on oil means nothing to the tractor owner. All-the-time successful operation on oil is what cuts expenses and adds profits. That is what the Oil Pull guarantee means—at the power out of every gallon—no waste—full motor efficiency every minute—burning the fuel that is cheapest to buy.

The Company

Tractor buyers have learned by experience the importance of having behind their tractor a well established, permanent company—one that is equipped to give reliable, over the hand service. Three generations of successful growth have built for Advance-Rumely a manufacturing institution of permanency and great strength. Factories at La Porte, Ind., Battle Creek, Mich., and Toronto. Over 127 modern factory buildings covering 155 acres—these are tangible evidence of work well done, new friends made and old friends kept. 29 branch offices and warehouses, each with a complete stock of machines and parts, render to its customers the all important, close at hand, immediate service.

WITH THE BUSINESS YOU ARE DOING

If you are a Live Merchant you never are. You want more. The way to get new business is to get new customers, and when you get new customers to keep them. You can get new customers, and more of the business of your present ones, by Advertising. To keep them is the test of service.

The Strathmore Standard, with its circulation extending over the whole of the Western Bow Valley, is read by thousands each week. If you advertise properly in its columns, you will not fail to get results. Try it out now, when business is good, and there is a fine opportunity to increase it.

Your advertising should be a help to your customers in making their purchases. Is it? Many farmers' wives find the "Farmers Bible" a time saver when making purchases. They would rather buy locally if they know they could get the goods they want here at right prices. Why not tell them?

A word to the Reader—Tell your merchant what you think of his advertising. Your ideas may help him and help you too.

of the Union Bank at Winnipeg, on
visit to Strathmore during the week
end. "Jimmy" was a member of years
ago accountant in the Strathmore
Branch of the Union Bank, and made
himself a host of friends. His promi-

here, and he now occupies one of the
highest executive positions on the
bank staff. While down at the bank
Jimmy picked up Roland Hill, who has
also been down there on a holiday,
and when the two got together, long

back on Sunday evening, having been
away longer than he originally intend-

Among those who attended the fun-
eral at High River last week of Mr.

Payments on participation certifi-
cates on the 1919 crop at the rate of
20 cents per bushel are now being
made. There has been considerable
delay in the payments of these
through the Winnipeg office of the
Board, it being six or seven
weeks since the certificates were
handed in. There is another payment
to come on the 1919 crop, and it
probably be between 10 cents and
15 cents per bushel.

Miss Margaret Craven left Strath-

where she will resume her studies.

There has been a little fire in the
air these last two or three mornings,
and potato stems are pretty well
dried. Remembering last year's experi-
ence, now would be a good time to dig
up the tubers.

Mr. J. W. Curran the new proprie-
tor of the rooming house is having
a Delco electric light system install-
ed in his building. He is expecting to
start remodeling and will enlarge the
present office and make an effort to
turn the place into a first-class hotel
within as short a time as possible,
which will be a great benefit to the
town of Rockyford.

One of the visiting Rotarians last
week said that the road from Strath-
more to Calgary was almost "imposed"
where it had been "imposed". The
Chesterman stretch, which this spring
was the best part of the road, where
"the work" was, has been fallen since
it has been graded, and the man who
has to turn his car out of a rut while
another car is passing has quite an
anxious time while doing so. However,
if a good rain falls soon the whole
road should be in good shape. None
of the other roads throughout the
country, with the effect of the long
spell of dry weather, are getting
piled up, sandy, and there are some hot
spots.

Wedding

VENABLES—MONTGOMERY

The wedding of Kathleen, second
daughter of Rev. Canon and Mrs.
Montgomery, Strathmore, to C. H.
Venable, of Calgary, took place at St.
Michael's and All Angels Church,
Strathmore, last Sunday, at 4:30 a.m.
The church was beautifully decora-
ted with flowers. Miss Helen Mont-
gomery, sister of the bride, was brides-
maid, and Mr. Ralph Venable,
brother of the groom, best man.
The bride was given away by her
father, Canon Montgomery. The marriage
ceremony was performed by the
brides father.

After the marriage Dr. and Mrs.
Gavin gave the bride party a delectable
wedding breakfast. The happy couple
then left by motor for Calgary to
reside with the Venable family, an
extended trip to Vancouver and Victo-
ria.

The wedding presents were nume-
ous and varied, among them being a
handsome silver service presented to
the bride by the Calgary staff of the
Royal Bank of Canada.

The recent accidents in this vicinity
have again drawn attention to the
good work that Strathmore Hospital,
under the superintendence of Nurse
Williams, is doing. If it were not for
the hospital some of the serious ac-
cidents recorded would be fatal ac-
cidents. When the time comes for the
vote on Municipal hospitals, people
should have had enough demonstration
of the value of the hospital here
to vote for the big scheme, and carry
it by a sweeping majority. In the
other centres where hospital schemes
have been organized the tax is only
three to four cents an acre, which is
less than many people pay for an ac-
cident policy alone, and the municipal
hospital is open to every resident
for sickness, maternity or accident
at \$1.00 per day.

produce shipping department through
which they propose to market all the
produce offered for sale by the members
of their branch and an arrangement is
being made with the United Farnams
of Canada whereby fresh wool will be
sent to the same export shippers.
